

# Quality Policy

It is the policy of Pasquill to lead the timber engineering market sector, with a focus on quality, value and service for every customer. To achieve this we will:

- Provide the workforce with the training, tools, skills, motivation and innovation to produce high quality products and services.
- Empower the workforce so that everyone is responsible and accountable in achieving quality, value and service through knowledge of the key business objectives. Including Health & Safety as a number 1 priority.
- Continue to communicate, review and improve the effectiveness of the business management system.

Pasquill will continue to produce and supply timber engineering products that meet the technical requirements of the latest legislation and standards, as applicable.

A handwritten signature in black ink that reads "Ross Baxter".
