Posi-Joist™

Posi-joists™ are metal web joists which combine the light weight of timber with the strength of a steel web.

Features and Benefits

- Lightweight but strong
- Allows greater span distances than solid joists, giving greater design freedom
- Suitable for both floor and roof usage
- Open web design allows easy installation and access to services especially mechanical ventilation & heat recovery systems
- Faster installation and cost savings in time and materials
- Simple and safe to install
- Range of depths available
- Beams are dimensionally stable and cross grain shrinkage minimal
- Easily handled due to light weight
- Various end fixing details available
- Wide flanges for fixing flooring and plasterboard. Min 72mm wide fixing surface make flooring easy, controls shrinkage and reduces return visits and remedial work
- Suitable for use in ground floor applications
- The industry's first metal web joist system in the UK to obtain a robust detail for the resistance to the passage of sound
- Manufactured from PEFC certified timber

Our Commitments

We take our commitments to our customers, staff and the environment very seriously and ensure that we put in place procedures to meet our obligations through our certification, accreditations and associations.
